Vesta 2813

Seed drill with large load capacity (7000 litres), equipped with universal 3 points hitch (Category II-III) that allows the coupling of different sowing equipment. Wide variety of metering configurations (up to 4 different products), driven by mechanical or electrical transmission. Pneumatic transport system with high flow turbine and hydraulic drive.

The sowing equipements

The main sowing equipment and preferred by the users is the "SM Vesta", which allows to make an optimal sowing adapting to different working conditions, either no till, minimum tillage or conventional sowing. But if you prefer, you can also choose between tine coulters, suffolk coulters, discs, double disc or our new PT coulters. Even our PROSEM precision planter sowing equipment.

MAIN CHARACTERISTICS

- Hopper of 7,000 litres.
- Interchangeable tine coulter with tungsten tip
- Hydraulic turbine
- Double harrow with central control wheel
- Controller with: hectare counter, turbine revs counter, alarm of rotation of de metering unit and level seed sensor of the hopper in mechanical version.
- Equipment of LED lights.
- Kit for seed dose calibration.
- Type of wheels 550/60-22.5
